

2021-2023 Ford F-150 Switch Harness Installation Guide

Begin this installation with the display, lower trim and surrounding plastic already removed.

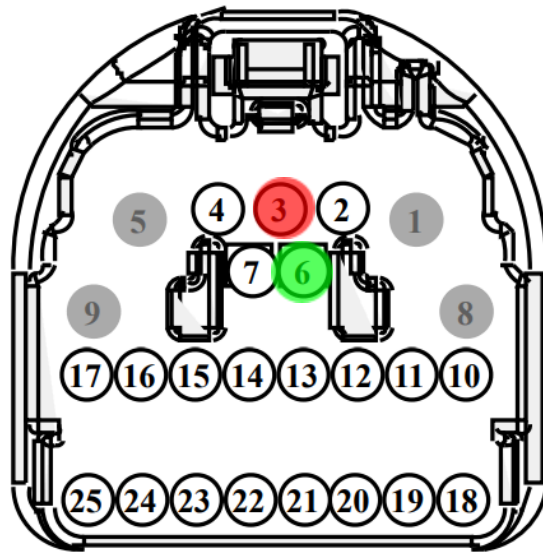

Locate & Disconnect the switch jumper harness(**C214**)

- Route the new harness from the far right switch(**C2304**) down to the original jumper harness.(**C214**)
- Depress the tab on the upper portion of the connector and pull outward. See photo below for a reference of the connector.

Begin Wire Tapping **C214** Jumper Harness

Once unlatched grab the female side of the harness and begin to use the included posi-taps to tap the two indicated wires. Please note that the color corresponds to the color of the wire on the new harness.

****IMAGE IS THE FRONT OF CONNECTOR****

Ground the black wire to the bolt located to the left of the switch connector. (**G202**)
